

Highlights:

- Stores up to 2 units of 19" Equipment belongings
- Full extension ball bearing drawer slide
- Drawer slide coupling allowing removal
- Solid cold rolled steel construction
- 1.8 mm front, 1.5 mm frame and 1.2 mm tray plate thickness
- Slam lock

The RD212L is a two rackspace 19" rack drawer constructed of heavy duty cold rolled steel, finished in a black (RAL 9004) powder coating. The fine structured finish guarantees a high scratch resistance, while the construction composed of a 1.5 mm frame, 1.8 mm front panel and 1.2 mm tray offers optimal strength and stability during heavy duty use.

These rack drawers can be used for storage of any belongings such as: cables, microphones, wireless transmitters, headsets, remote controls, instruction manuals, etc. The redesigned locking mechanism grants use of the drawer's full height to store equipment so that no space is lost.

The high quality full extension ball bearing drawer slide with decoupling mechanism allows a smooth removal of the drawer and easy access to the equipment stored in the back of the draw.
